# About CAIDP

- Trains the next generation of AI policy leaders
- Advocates & Supports AI initiatives, projects, and campaigns that safeguard rule of law, democratic institutions, and fundamental rights
- Researches & Publishes commentaries on AI policy
- Advises national governments and international organizations on AI policies and practices
- Promotes the Global Academic Network
- Organizes educational events with AI policy experts

## OUR MISSION -

*"The Center for AI and Digital Policy aims to promote a better society, more fair, more just—a world where technology promotes broad social inclusion based on fundamental rights, democratic institutions, and the rule of law."*

CAIDP's Merve Hickok [statement](#) on AI Policy before the US Congress, March 8, 2022 - *"The U.S. does not have the guardrails in place, the laws that we need, the public education, or the expertise in the government to manage the consequences of these rapid technological changes."*  
[\[CAIDP - House Hearing on Advances in AI\]](#)

## A brief history of AI governance:

AI Governance is not simply about  
“AI Ethics” or “Responsible AI”

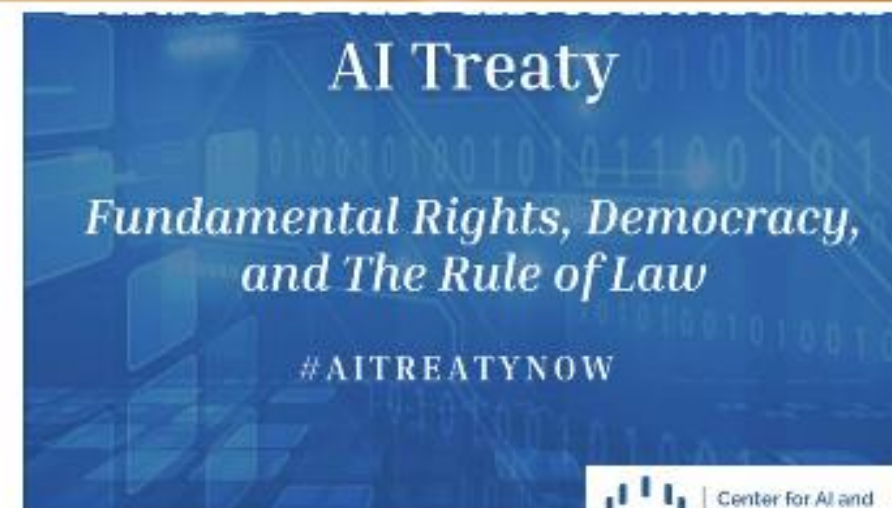

# AI Governance is about the laws and policies established to

- (a) promote human-centric and trustworthy AI
- (b) ensure safe, secure, and trustworthy AI
- (c) safeguard democratic values, fundamental rights, and the rule of law
- (d) all of the above

??? was the first Latin  
American country to sign  
the ??? global AI treaty.

**Arvin OBNASCA** Aug 26th at 5:55 PM

Today, the General Assembly established two new institutions to promote international cooperation on AI: a Global Dialogue on AI Governance and an Independent Scientific Panel on AI.

An open call for nominations for the Scientific Panel will be launched soon, with annual reports presented at the Global Dialogue in Geneva (2026) and New York (2027).

## Statement attributable to the Spokesperson for the Secretary-General – on the General Assembly decision on new artificial intelligence governance mechanisms within the United Nations

Stéphane Dujarric, Spokesman for the Secretary-General

The Secretary-General warmly welcomes the General Assembly's decision to establish two new mechanisms within the United Nations to promote international cooperation on the governance of artificial intelligence (AI).

The establishment of the United Nations Independent International Scientific Panel on AI and the Global Dialogue on AI Governance marks a significant step forward in global efforts to harness the benefits of artificial intelligence while addressing its risks. This pathbreaking milestone underlines Member States' commitment to build on the Global Digital Compact adopted as part of the Pact for the Future in September 2024.

"The Secretary-General will shortly be launching an open call for nominations for the Scientific Panel, which will present its annual reports at the Global Dialogue on AI Governance to take place in July 2026 in Geneva and 2027 in New York."

**Global Digital Compact Stakeholder Townhall Meeting (June 2025)**

Excellencies, distinguished delegates, thank you for the floor. Thank you to the United Nations (UN) Office for Digital and Emerging Technologies (ODET) for convening today's Global Digital Compact townhall meeting and to the expert panelists for sharing their insights.

I, Julian Theseira, speak on behalf of the Center for AI and Digital Policy (CAIDP), an independent, global, non-profit that has provided expert guidance on AI policy to the UN on multiple occasions and contributed to prior consultations on the Global Digital Compact and its mandated outcomes. Our remarks today focus on the Independent International Scientific Panel on AI and the Global Dialogue on AI Governance mandated by paragraph 56 of the Global Digital Compact.<sup>1</sup>

We at CAIDP note the progress in the Terms of Reference and Modalities for the Establishment and Functioning of the Independent International Scientific Panel on Artificial Intelligence and the Global Dialogue on Artificial Intelligence Governance (Rev2).<sup>2</sup> Yet, we highlight that decisive refinements are essential to make these bodies truly human rights centered.

Firstly, we recommend anchoring the mandate of the International Scientific Panel on AI explicitly in human rights and democratic values, and granting a permanent seat to a UN Special Rapporteur on AI and Human Rights<sup>3</sup>, to ensure that UN expertise on human rights guides and informs international scientific assessment of AI.

# Questions to Ask

- What is the Independent International Scientific Panel on AI? Who are the Members? Who can nominate?
- How to ensure “independence”?
- What are the mechanisms for implementation and enforcement?
- What is the relationship of the UN Scientific Panel on AI to other frameworks? Universal Declaration of Human Rights? EU AI Act related bodies? UNESCO?...
- What is the significance of Independent International Scientific Panel on AI?

# The Challenges for AI Policy

- AI is a vast field and changing rapidly
- There are thousands of AI policy experts, organizations, reports, news articles, and resources
- CAIDP anchors its work in **objective, authoritative research and analysis**
- CAIDP considers both the **horizontal** (there are many AI policy frameworks) and the **vertical** development of AI policy (each framework typically has antecedents, e.g. **GDPR -> EU AIA, COE 108+ -> COE AI Treaty**)

## Everything. Everywhere. All at Once: AI Policy When Congress Returns

Here is a quick take on what to look for in Washington and on the broader AI Policy landscape when Congress returns in September.

🔊 BREAKING - Uruguay is the first Latin American country to sign the Council of Europe's global AI treaty 🇺🇾

🇺🇾 Uruguay today signed the [Council of Europe's](#) Framework Convention on Artificial Intelligence and Human Rights, Democracy and the Rule of Law, the first-ever international legally binding treaty aimed at ensuring that the use of [#AI](#) systems is fully consistent with human rights, democracy and the rule of law.

🇺🇾🇺🇾 Uruguay has become the first Latin American country to sign the AI Treaty, joining 41 other countries that have endorsed the AI Treaty.

📄📋🏛️ In 2024, the [Center for AI and Digital Policy](#) launched a global campaign to encourage signature and ratification of the AI Treaty, urging countries around the world to support the first legally binding treaty for AI governance.

📄📋 On 27 March 2025, CAIDP issued a public statement respectfully urging the government of Uruguay to endorse the AI Treaty. CAIDP wrote, "As AI shapes societies worldwide, we urge Uruguay to sign and ratify the AI Treaty and commit to the full inclusion of the private sector under its provisions. By endorsing the treaty, Uruguay would reaffirm its commitment to human rights, democracy, and responsible AI governance, positioning itself as a regional leader in AI development."

September 3, 2025 (Council of Europe AI Treaty)

🔊 CAIDP Urges Young AI Leaders in Latin America to Set Redlines for AI Systems 🇺🇾

🌐 CAIDP is proud to see its long-standing recommendations reflected in the publication that preceded DCN Global's AI for Prosperity: Innovation and Economic Growth in the Americas [#BuenosAires](#) (May 2025).

👤 "This report can serve as a playbook for the Global South young start-up ecosystem, mindful of infrastructure gaps and systemic inequalities. The goal is to ensure the right questions guide [#NorthSouthpartnerships](#) and solutions are homegrown, serving the region's unique cultural, economic, and social context," said [Ayca Ariyoruk](#), CAIDP Fellow. "We are especially encouraged to see frameworks like the Universal Guidelines for AI, with values of [#human](#) rights woven throughout

📄 An excerpt from the report :

📄 "Frameworks such as the Council of Europe's AI Treaty (Council of Europe, 2024) which Latin American countries participated as observer and non-member states (Mexico, Canada, the United States, Uruguay, Costa Rica, Peru and Argentina) are a legal instrument that can inspire national debates, adaptations, and policy development tailored to the region's unique political and economic context, helping set human rights as a foundational reference."

## May 2025 (DCN Global's AI for Prosperity: Innovation and Economic Growth in the Americas)

🔊 Public Citizen, CAIDP, and 30+ Other Organizations urge OMB to Shut Down Grok 🇺🇾

We are proud to join with [Public Citizen](#), [Color Of Change](#), [Consumer Federation of America](#), and 30 other organizations in calling on the [Office of Management and Budget](#) to bar the use of [#grok](#) in the federal government. Grok fails to comply with the necessary requirements for the acquisition and deployment of AI systems by federal agencies.

📄 Executive Order 14099 clearly requires agencies to procure only those LLMs that are truth-seeking (LLMs shall prioritize historical accuracy, scientific inquiry, and objectivity) and ideologically neutral

📄 The Administration has said that federal AI systems must "objectively reflect truth rather than social engineering agendas" and be "neutral, nonpartisan tools that do not manipulate responses in favor of ideological dogmas."

📄 Grok's ideological bias, erratic behavior, and tolerance for hate speech render it wholly incompatible with the Administration's AI principles

📄 OMB expressly requires agencies to discontinue use of an AI system if proper risk mitigation is not possible

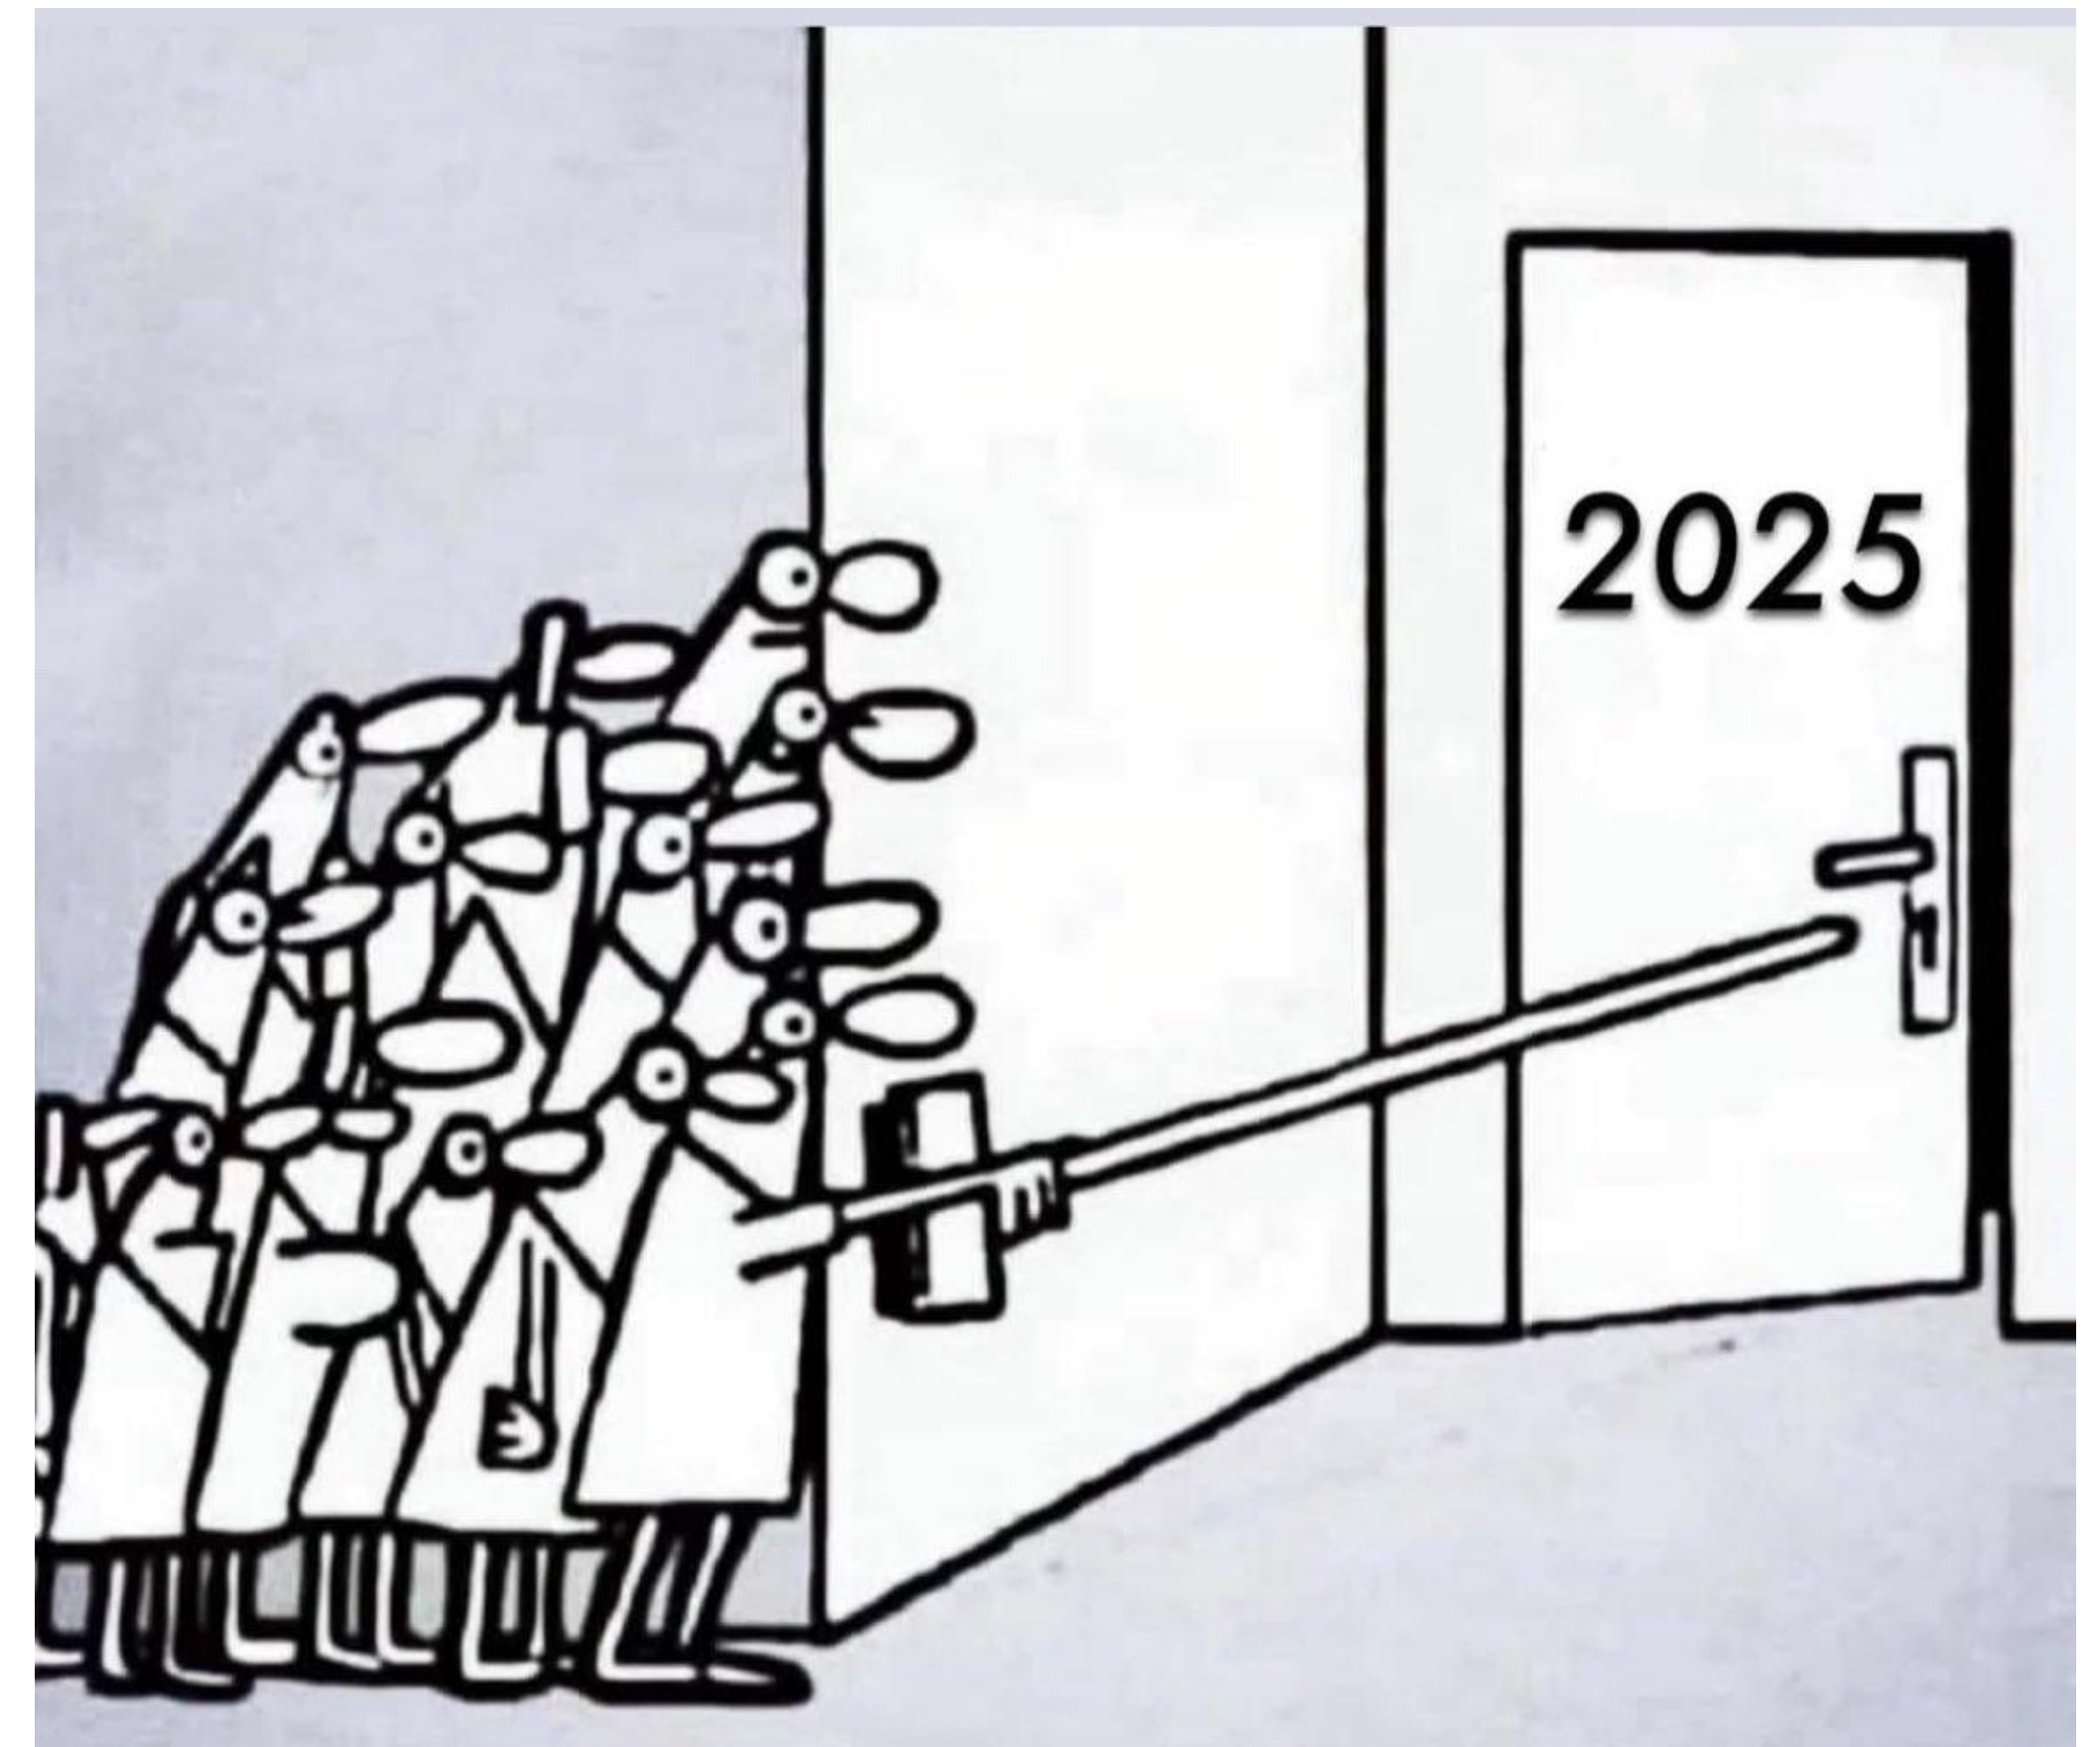

📄📄 We respectfully request that OMB, in coordination with the Office of Federal Procurement Policy and relevant agencies, explicitly prohibit Grok's use within the federal government.

# A Note on Philosophy

- The work of CAIDP is objective, authoritative, timely, and accurate
- We will seek to influence global AI policy at the national and global levels
- We favor the protection of fundamental rights, democratic institutions, and the rule of law
- We also believe in professional ethics for AI
- You will develop the skills to become a more effective AI policy analyst, advisor, and advocate

## STATEMENT OF PROFESSIONAL ETHICS FOR AI POLICY

I recognize that AI systems may impact the opportunities and rights of others.

I recognize that bias is an ongoing challenge in the design and use of AI systems.

I recognize that AI systems may pose a risk to public safety.

I will work to ensure that AI systems are fair, transparent, and accountable.

I will work to ensure that AI systems protect fundamental rights, the rule of law, and democratic values.

I will work to ensure diverse perspectives are represented in discussions about AI policy.

I will provide advice about AI systems that is objective, fair, and well-supported.

I will reveal any conflicts of interest that may influence my recommendations.

I will continue to review emerging issues in AI policy to ensure that my advice reflects the best information available to me at the time I make an assessment.

I will work to ensure that AI systems are human-centric and trustworthy.

# The AI Policy Clinic

# The AI Policy Clinic

The AI Policy Clinic is one of the program activities of the Center for AI and Digital Policy (CAIDP). The Policy Clinic program is an outgrowth of the work of the CAIDP Research Group, and the preparation of the report ***Artificial Intelligence and Democratic Values***, the first comparative study of AI policies and practices around the world. The ***AI and Democratic Values report*** also set out a methodology to rank and rate the AI policies and practices of countries.

# The AI Policy Clinic

The AI Policy Clinic is an intensive, interdisciplinary, semester-long course, established to teach future leaders in the AI policy field basic skills in AI policy analysis, research, and evaluation. Topics covered include AI History, AI Issues and Institutions, AI Regulation, and Research Methods. Successful completion of the program will lead to the award of the **AI Policy Certificate**. Candidates are also required to sign a **Statement of Professional Ethics for AI Policy**.

# AI Policy Clinic: Learning Objectives

- Develop analytic skills for AI policy
